### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Change the Title to:

Antioxidant Sesame Extract

In the Specification:

Page 11, after "Fig. 1" in line 25, insert "and Fig. 1a".

### **Examiner's Reasons for Allowance**

2. The following is an examiner's statement of reasons for allowance:

Purdy et al discloses a product that contains "primarily a mixture of sesamin and sesamol" (col. 2, line 10). Since the instant claims call for an extract with a lignan content that is primarily sesamin with smaller amounts of sesamol and sesamol, it does not appear that the Purdy et al product would inherently contain the claimed sesamol, sesamin, and sesamol amounts. By setting for that the product is primarily sesamin and sesamol without specific mention of sesamol, Purdy et al suggests that the amount of sesamol (if present) is significantly lower. The instant claims call for primarily sesamin with much lesser amount of sesamol, and an even lesser amount sesamol. In addition, Purdy et al is silent regarding the specific other components which may have been extracted and found in the distilled (see col. 2) other than to say

there existed "minor amounts of other unsaponifiable materials". Also, the invention used by Purdy et al to obtain the claimed invention employs a significantly different steps including two extractions steps employing different types of solvents; Purdy et al only employs a single extraction with acetonitrile followed by a distillation step. As such, it is not clear that all of the other components called for in instant claims 1 and 18 would exist in the product of Purdy et al. Moreover, it is expected due to the differences in processing that the Purdy et al product would contain components outside of those specifically recited in the "consisting of" claims of the instant product. Due to these differences in processing, it is not expected that the same product composition would be achieved. It would not have been obvious to one having ordinary skill in the art at the time of the invention to have arrived at the particular composition including sesamolin, sesamin, and sesamol amounts called for in the instant claims as there is no suggestion in the prior art of record to modify the composition of the Purdy et al extract to attain the profile called for in the instant claims.

Like Purdy et al, JP 62-172086 employs a process that differs greatly from that employed to provide the product of the instant invention including a strong acid treatment. In addition, JP 62-172086 is silent regarding the particular amount of sesamol, sesamin, and sesamolin that may still exist in the extract after such treatment. Moreover, there is no indication as to the presence of all the other compounds and elements called for in claims 1 and 18. In addition, there is no indication and expectation that the extract derived in JP 62-172086 would be restricted to only those compounds and elements set forth in the instant claims. It would not have been obvious

Art Unit: 1794

to one having ordinary skill in the art at the time of the invention to have arrived at the particular composition including sesamol, sesamin, and sesamol amounts called for in the instant claims as there is no suggestion in the prior art of record to modify the composition of the Purdy et al extract to attain the profile called for in the instant claims.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Weier whose telephone number is 571-272-1409. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
